

# Reducing risk of coronavirus transmission for faith-based communities

## LOWEST RISK

### VIRTUAL SERVICES

- Continue to support the community using remote and online resources
- Explore creative ways for members to stay connected and supported remotely such as online small group meetings, livestream services, and/or virtual one-on-one sessions with a religious leader

## MODERATE RISK

### DRIVE-UP SERVICES

- Hand out single use items (worship aids, bulletins, communion, etc), through a car window
- All members handing out items should wear a mask, practice hand hygiene, and otherwise maintain proper distance
- Consider a mechanism for those without vehicles to participate outdoors (following recommendations in the next panel)
- Offer a way for vulnerable members to participate remotely

## HIGHER RISK

### OUTDOOR SERVICES

- Stay at least 6 feet apart from people you don't live with
- Wear a mask
- Avoid shared items including worship aids, prayer rugs, prayer books, hymnals, religious texts and other bulletins, books, or shared cups
- Avoid singing
- Avoid lining up, consider handing out single use items (worship aids, bulletins, communion, etc), through a car window on entry or exit
- Offer a way for vulnerable members to participate remotely

## HIGHEST RISK

### INDOOR SERVICES

- Stay at least 6 feet apart from people you don't live with
- Wear a mask
- Avoid shared items
- Avoid singing
- Avoid lining up, consider handing out single use items through a car window on entry or exit
- Clean high touch areas (door handles, seats) with an EPA approved agent between services
- Offer a way for vulnerable members to participate remotely
